Light Exposure Behaviour Assessment: Short Form

Disclaimer: This is a non-public version of Light Exposure Behaviour Assessment (LEBA): Short Form (dated February 28, 2022) and still a work in progress.

LEBA captures light exposure-related behaviours on a 5 point Likert type scale ranging from 1 to 5 (Never = 1; Rarely = 2; Sometimes = 3; Often = 4; Always = 5). The score of each factor is calculated by the summation of scores of items belonging to the corresponding factor.

Instruction:

“Please indicate how often you performed the following behaviours in the **past 4 weeks.**”
